SUMMARY

Full-stack developer with **4 years of experience** in both **front-end and back-end development**, specializing in technologies like **PHP (Laravel), JavaScript, React.js**, and more. Passionate about **building innovative solutions** and committed to **continuous learning** to stay current with modern development trends. Thrive in **collaborative, team-oriented environments** and take pride in delivering scalable, maintainable software.

JOB EXPERIENCE

Source Code Myanmar Co.,Ltd. / Full Stack Developer   **Apr, 2024 – Current**

Rextlab – Real Estate Application

- Developed a real estate investment platform using **PHP (Laravel), JavaScript, and Bootstrap** with interactive simulations and charts (repayment ratio, rent vs buy, profit forecasts, and investment comparisons).
- Implemented **dynamic yearly/monthly profit reports** based on user input and property conditions.
- Built detailed **investment reporting modules**, including breakdowns and comparisons with alternative investments.

IorCarrer – Job Seeker Application

- Developed a job seeker and real estate listing platform using **PHP (Laravel), JavaScript, and Bootstrap**, featuring job posting, applications, and real estate listings.
- Integrated with a **mobile app via REST API** for real-time updates and user interaction.
- Deployed key modules: **user management, real estate management, user profiles, and user-owned posts** (jobs & real estate).

Won Yone – Pos Application

- Built a POS system using **PHP (Laravel), JavaScript, and Tailwind CSS**, covering sales, inventory, expense tracking, reporting, and payroll.
- Supported **internal workflows** for both the design team and administrative operations.
- Deployed modules such as **stock management, employee management, and expense tracking**.
- **Won Yone**

Juvenus – Pos Application

- Developed a POS application with **PHP (Laravel), JavaScript, React.js, and Material UI**, integrating a **loyalty system** with points and rewards.
- Connected with a **mobile app via REST API** for real-time sales and loyalty tracking.
- Deployed modules like **stock management, draft sale transactions, gift card management, and reporting**.

The District Coffee lounge – Pos Application

- Built a POS and RMS system with **inventory management for 4 branches** using **PHP (Laravel), JavaScript, and Bootstrap**. Integrated **loyalty system, mobile ordering, and payment gateway** via REST API.
- Maintained the system with ongoing **updates and mobile app integration** for orders and sales tracking.
- **The District Coffee Lounge**

HtaWaRa – An Educational Application

- Developed an educational platform with **articles, videos, podcasts, games, and certified courses** using **PHP (Laravel), JavaScript, and Bootstrap**.

- Integrated with a **mobile app via REST API** for interactive learning and service access.
- Maintained and updated the system, including development of the **"Emotional Wall"**, a social feature for user engagement.
- **HtaWaRa**

Freelance   **2024**

Promethia Website

- Developed with **PHP, Laravel, JavaScript, and Bootstrap** to manage products, collections, and orders.
- Implemented functionality for searching tenders and RFQs, with advanced filters to match supplier preferences
- Enabled bid submission with itemized pricing, document uploads, and compliance confirmation workflows
- **https://mptc.soisoft.com/**

Host Myanmar Co.,Ltd. / Full Stack Developer   **Jan, 2021 – Sep, 2023**

KoKyarGyi Ecommerce Application and Admin Dashboard

- Developed with **PHP, Laravel, JavaScript, and Bootstrap** to manage products, collections, and orders.
