PROFESSIONAL SUMMARY

Full-stack developer with 4+ years of experience designing and shipping [production web platforms / fintech applications / e-commerce systems / POS & retail systems] using PHP (Laravel), JavaScript, React.js, and Next.js. Delivered 10+ end-to-end products spanning payments, real estate, e-commerce, POS/retail, and EdTech, including secure KYC/OTP authentication, REST API integrations, and dynamic reporting modules. Comfortable owning a feature from database design through deployment in fast-moving, collaborative teams.

TECHNICAL SKILLS

Languages: JavaScript, PHP

Frameworks & Libraries: Laravel, React.js, Next.js, Bootstrap, Tailwind CSS, Material UI

Databases: MySQL, MongoDB

Cloud & DevOps: AWS (EC2, S3), Docker, Git

Domain Skills: REST API Design, OTP/KYC Authentication, POS/Inventory Systems

PROFESSIONAL EXPERIENCE

Source Code Myanmar Co., Ltd. | Full Stack Developer

Apr 2024 – Apr 2026

MsRemit – Money Transfer Application [Fintech · Payments · KYC/OTP]

- Developed a money transfer platform using PHP (Laravel), Next.js, and Tailwind CSS with OTP authentication (Twilio) for users in Myanmar, Thailand, and Australia.
- Enabled customers to perform online transfers and implemented secure KYC verification during account registration.
- Built an admin system to review transactions and approve or reject requests based on KYC and transfer validation.

Rextlab – Real Estate Investment Platform [PropTech · Data Visualization]

- Developed a real estate investment platform using PHP (Laravel), JavaScript, and Bootstrap with interactive simulations and charts (repayment ratio, rent vs. buy, profit forecasts, investment comparisons).
- Implemented dynamic yearly/monthly profit reports based on user input and property conditions.
- Built detailed investment reporting modules, including breakdowns and comparisons with alternative investments.

IorCarrer – Job Seeker & Real Estate Platform [Marketplace · REST API]

- Developed a job seeker and real estate listing platform using PHP (Laravel), JavaScript, and Bootstrap, featuring job postings, applications, and real estate listings.
- Integrated with a mobile app via REST API for real-time updates and user interaction.
- Deployed key modules: user management, real estate management, user profiles, and user-owned posts.

Won Yone – POS Application [POS · Inventory · Payroll]

- Built a POS system using PHP (Laravel), JavaScript, and Tailwind CSS covering sales, inventory, expense tracking, reporting, and payroll.
- Deployed modules for stock management, employee management, and expense tracking, supporting both design-team and administrative workflows.

Juvenus – POS Application [POS · Loyalty]

- Developed a POS application with PHP (Laravel), JavaScript, React.js, and Material UI, integrating a loyalty system with points and rewards.
- Connected with a mobile app via REST API for real-time sales and loyalty tracking; deployed stock management, draft sale transactions, and gift card modules.

The District Coffee Lounge – POS Application [POS · Multi-Branch · Payments]

- Built a POS and RMS system with inventory management across 4 branches using PHP (Laravel), JavaScript, and Bootstrap; integrated loyalty, mobile ordering, and payment gateway via REST API.
- Maintained the system with ongoing updates and mobile app integration for orders and sales tracking.

HtaWaRa – Educational Platform [EdTech · Social Features]

- Developed an educational platform with articles, videos, podcasts, games, and certified courses using PHP (Laravel), JavaScript, and Bootstrap.
- Integrated with a mobile app via REST API for interactive learning; built the "Emotional Wall," a social feature for user engagement.

Freelance | *Full Stack Developer*

2024

Promethia – Tender & Procurement Platform *[E-commerce · Procurement/RFQ]*

- Developed with PHP, Laravel, JavaScript, and Bootstrap to manage products, collections, and orders.
- Implemented tender/RFQ search with advanced filters to match supplier preferences.
- Enabled bid submission with itemized pricing, document uploads, and compliance confirmation workflows.

Host Myanmar Co., Ltd. | *Full Stack Developer*

Jan 2021 – Sep 2023

KoKyarGyi – E-commerce Application & Admin Dashboard *[E-commerce]*

- Developed with PHP, Laravel, JavaScript, and Bootstrap to manage products, collections, and orders.
- Implemented automated invoice generation and email delivery, streamlining order processing.

Grand Winner – Accounting Management System *[Accounting · ERP]*

- Built with PHP, Laravel, JavaScript, and Bootstrap, supporting customer management, stock control, invoicing, account codes, and daily transactions.
- Designed reporting modules tracking income and expenses by account group, with daily/monthly financial charts.

Zawtika Gold Shop – Management System *[Retail · Inventory]*

- Developed using PHP, Laravel, JavaScript, and Bootstrap to manage sales ledgers, daily sales, gold pricing, items, and goldsmith records.
- Added functionality to generate and print sale vouchers per transaction, improving shop efficiency.

MEC – Management System *[Enterprise · Asset Management]*

- Built with PHP, Laravel, JavaScript, and Bootstrap, featuring stock management, income/expense tracking, and branch-level data visibility.
- Added reporting for maintenance, usage, and damaged stock, plus invoice printing for maintenance and purchase orders.
